FINAL REPORT
1987 GORDON RESEARCH CONFERENCE
ON
HOLOGRAPHY AND OPTICAL INFORMATION PROCESSING

January 5-9, 1987
Miramar Hotel
Santa Barbara, CA

1. Technical Statement

The field of Holography and Optical Information Processing is an important and active one with many significant advances during the past twenty years. This conference had 19 formal talks describing the most recent areas of interest. A complete list of speakers is included in Appendix A.

The conference contained a carefully selected mixture of talks including optical computing, components and architectures; optical processors; holography; and applications of coherent light.

In addition, 11 contributed poster papers were presented on Tuesday evening. The papers were posted early in the conference dining room and they remained for two days so it was relatively easy to have a short or lengthy session with a given author. Thursday evening was reserved for informal presentations which generated numerous discussions. Many of the discussions continued well into the night.

2. Funding

The purpose of this document is to report on the expenditures of funds received from the AFOSR and DARPA in response to an unsolicited proposal. In the proposal it was indicated that these funds would be spent to promote attendance of scholars who would otherwise be hampered from attending. The awardees are listed in the following table:

<u>Name</u>	<u>Institution</u>	<u>Amount</u>
Gerald Roosen	U. Paris	\$ 600

3. Conference Attendance

There were approximately 90 people attending this conference. A partial address list is included in Appendix B. The breakdown of attendees is approximately as follows:

56% from Universities

11% from Government

33% from Industry

Participants came from every geographic area of the United States and several foreign countries.
